DIABETES TREATMENT & RESEARCH

- A diabetes patient must enlist the assistance of a wide range of specialists for comprehensive treatment of the disease, spending precious time visiting specialists in widely dispersed clinics, including a family physician, endocrinologist/diabetes specialist, ophthalmologist, diabetic podiatrist, and dietician, and in between, undergo laboratory and other tests.
- The Gabriel Cabra Bildirici Diabetes Center is the first and only center in Israel to solve this problem by grouping all the required tests, treatments, and medical experts in a wide range of specialties under one roof, thus enabling comprehensive treatment of diabetes.

CURRENT RESEARCH & DEVELOPMENT PROJECTS

- Paediatric influenza a/h1n1 infection in a primary hospital in Israel BC Stem Cell Research focused on innovative stem cell-based therapies
- Effect of Insulin enriched formula on gastrointestinal tract maturation in preterm infants
- Secondary neuronal damage in Foetal Spina Bifida and associated hydrocephalus
- Neonatal screening for the early detection of Gaucher disease in high risk population
- A Novel West Nile Virus Infection Therapy

LANIADO HOSPITAL

- Sanz Medical Center—Laniado Hospital is named after two Syrian brothers, Alphonse and Ya'akov Avraham Laniado. They provided the preliminary funds to found the hospital, while the remaining funds were collected by the Klausenberger Rebbe of the Sanz dynasty.
- The hospital is run according to Jewish law and all legal medical issues regarding treatment and end of life situations are dealt with in consultation with the Hospital Rabbinic advisor.
- The whole hospital is Kosher all year round and Kosher for Pesach.
- Here in the UK, the Laniado team provide Holocaust educational sessions telling the story of The Klausenberger Rebbe's experiences during the war.

NURSING TRAINING

- The Academic Tessler School of Nursing includes courses on all aspects of Jewish law pertaining to medical issues as part of the curriculum.
- The teaching process places special emphasis on the supreme value of the sanctity of human life, and the equal right of every human being to receive nursing care.
- The school has a reputation as one of the best, routinely producing graduating classes with some of the highest grades in the country.
- Both the school and the dormitory are run under the guidance and direction of noted Rabbinic authorities.

CHILDREN & EDUCATION

The Korall Children's Medical Center incorporates within it an independent school, offering educational services for hospitalized children.

The education area includes:

- Early childhood room—from age three through to Year 2.
- Computer room—designed for computer-aided learning of topics.
- Indoor play-space—large area for activity and learning, designed for pre-school age children.
- A varied library, educational and social games, worksheets, computer games and arts-and-crafts.

BIRTHING

The Betty Retter Mother & Baby Medical Center in Laniado delivers more than 7000 babies annually. To put this in perspective, The Royal Free Hospital here in London delivers just 3800 babies a year and UCH around 5000!

This is what we provide:

- Birthing rooms, with separate entrances for accompanying family/friends
- An operating room within the birthing complex for Caesarean sections, when necessary
- The option of private services: Doctor, Personal Nurse-Midwife, Doula, Anesthesiologist
- The Diada-Laniado Natural Childbirth Center
- High-Risk Pregnancy Unit
- Special Care (Preemie) Baby and Neonatal Intensive Care Unit
